

## Compound Word Fun

- 1) Write one compound word on each card.
- 2) Draw a line between the two words in the compound word.
- 2) Players cut the cards so that the words are separated.
- 3) Talk about the individual words and what they mean.
- 3) Mix up all the cards and then find the words that go together to make the original compound words.
- 4) Talk about the compound words, what they mean and how they are different from the two smaller words.

Next, have the group write a set of cards to be used later at home with their children. Parents can cut the cards or have the children cut the cards. Play the game as described above.
